

Air Sanitizing Fogger Fresh Linen

This product eliminates odors by killing odor causing bacteria from the air when used as directed. As an air sanitizer, this product effectively kills odor causing bacteria to cleanse the air you breathe. As a deodorant, the next generation odor counteractant system chemically bonds with the malodor molecule destroying the odor source instead of just covering up or masking. Odors from mildew, smoke, vomit, feces, urine and putrescence emitting from garbage receptacles, diaper hampers, sinks, drains, toilets, urinals and more are effectively eliminated with this product. Easy-to-use lock down valve totally releases contents in less than 3 minutes to control bacteria up to 6000 cubic feet per can. Active Ingredients: Triethylene Glycol 5.50%. Other Ingredients: 94.50%.

- One shot treatment up to 6000 cubic ft.
- Total release fogger with lockdown valve.
- EPA registered sanitizer.

Technical Specifications

Appearance	Fine Mist
Dilution Rate	N/A
Color	Colorless
Scent	Fresh Linen
Non Volatile Matter	n/a
pH @ 25 deg. C	9.00 - 10.00
EPA Registration No.	EPA Reg. No. 10807-431-1658

HMIS (Concentrate/RTU)

Flammability = 3 Health = 1 Reactivity = 0

Safety

See material safety data sheet and product for safety information, handling and proper use.

Availability

HIL0109954 12 - 6 oz. Cans

Directions

This is an EPA registered disinfectant. Please refer to the actual container label for complete directions.

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

DO NOT use more than one fogger per room. DO NOT use in small, enclosed spaces such as closets, cabinets or under counter or tables. Do not use in a room 5 ft. x 5 ft. or smaller; instead, allow fog to enter from other rooms. Close all air sources such as windows, doors, and vents. Relative humidity should be 45-75% for maximum effectiveness. One 6 ounce aerosol can discharges completely in less than 3 minutes and treats up to 6,000 cubic feet of unobstructed area (a room 30 ft. by 25 ft. with an 8 ft. ceiling).

To temporarily reduce airborne bacteria and eliminate odors, place can in the middle of the room to be treated. Remove cap and place can on newspaper, paper towel, or other media to be discarded if any accidental accumulation or fallout occurs near the can. Stand to the side of the can and activate fogger by pressing down the tab of the lock down actuator until it snaps into the open position. Avoid spraying in face. Do not remain in room. Leave and close door behind you. Return after fog has settled (approximately 15 minutes) and reopen air sources.
