

Sour/Soft 70

Sour/Soft 70 is a balanced blend of fabric softening agents and a laundry sour. Softened linens have a softer, smoother feel; towels and diapers are fluffier; clothes have fewer wrinkles requiring less ironing. It also neutralizes the alkaline detergent residues and water hardness minerals that cause iron staining and graying of fabric. Sour/Soft 70 has proven to be very economical to use in all institutional laundries. For institutional laundry use only. Do not use with ammonia or bleaches.

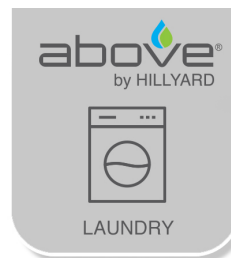

- Controls pH
- Iron Control
- Softens Fabrics
- Eliminates Static

Technical Specifications
