Trident® XM13SC

Eliminate the mop bucket, improve results, enhance safety! The Hillyard Trident XM13SC is a compact, lithium-ion powered micro-scrubber that scrubs and dries in a single pass. The innovative rotary head is equipped with a parabolic squeegee that continuously follows the direction of the machine, delivering perfect scrubbing and drying results in any direction. The XM13SC is perfect for tight spaces. Clean under chairs, tables, shelving units and more. The offset brush enables total cleaning - all the way to the wall! An engineered aluminum uni- body chassis is sturdy and light weight resulting in less strain on the operator during use and transport. The Eco Mode function helps conserve water, detergent and energy by using only the quantities you need and nothing more. When not in use, the machine's compact dimensions and design mean that it can be stored upright, anywhere, even in the smallest closet. Have peace of mind that your investment is backed by Hillyard, a 110 plus year old family company with the Hillyard Customer First Warranty program.
